

Universal 'Clic-Clac' Basin Waste

WARNING

We accept no liability for products fitted incorrectly, and where the correct testing procedures have not been used, resulting in the escape of water.

INSTALLATION

Freeflow Setup

To set up the Universal Basin Waste as a Freeflow waste, follow these steps:

1. Remove the top by rotating it counter clockwise.
2. Insert the freeflow clip onto the top of the shaft, ensuring the long part enters the groove above the screw.
3. Screw the top back on by rotating it clockwise.

The result will be a permanently open and freeflowing waste which can be easily converted back into clic-clac whenever required.

'Clic-Clac' Setup

For a standard clic-clac setup, assemble without the freeflow clip, as per the main illustration.

We recommend cleaning all products with a soft damp cloth ONLY and advise strongly against the use of ALL cleaning products i.e. powders and liquids.

Installation videos and further information available now.
